## I. INTRODUCTION

Defendant has not put forth a single piece of evidence contesting any of the opinions in Anya Verkhovskaya's expert report. Krivoshey Decl., Ex. 1 ("Verkhovskaya Report"). Defendant also does not challenge Ms. Verkhovskaya's qualifications. Instead, Defendant states that Ms. Verkhovskaya's opinions should be excluded because Defendant found them too confusing and because she relies on third-party data processors (LexisNexis) whose data is purportedly not "testable." See Def's Br. at 6. Critically, of the 40,420 cellphone numbers belonging to non-debtors that Defendant called using its autodialers identified in Ms. Verkhovskaya's Report, Defendant has not put forward any evidence (1) that even one of the 40,420 numbers are not assigned to cellular telephones or (2) that even one of the 40,420 numbers belonged to a debtor on the associated account. See Verkhovskaya Report, at ¶ 26. Ms. Verkhovskaya's methodology employed in this case, including the reliance on LexisNexis, has been nearly universally held to be admissible under the requirements of *Daubert v. Merrell Dow Pharm., Inc.*, 509 U.S. 579 (1993). See, e.g., *West v. California Serv. Bureau, Inc.*, 323 F.R.D. 295, 302, 304-305 (N.D. Cal. 2017) (Gonzalez Rogers, Hon.) (denying motion to exclude expert testimony regarding reverse look-up methodology that relied on LexisNexis data). To the extent that Defendant believes that the sources for Ms. Verkhovskaya's methodology are inaccurate, such arguments go to the weight to be afforded to Ms. Verkhovskaya's testimony, not admissibility. Accordingly, Defendant's motion to strike or exclude Ms. Verkhovskaya's opinions should be denied in full.

## II. LEGAL STANDARD

"[S]cientific, technical, or other specialized knowledge' by a qualified expert is admissible if it will 'help the trier of fact to understand the evidence or to determine a fact in issue.'" *AngioScore, Inc. v. TriReme Med., Inc.*, 2015 WL 5258786, at \*6 (N.D. Cal. Sept. 8, 2015). "An expert should be permitted to testify if the proponent demonstrates that: (i) the expert is qualified; (ii) the evidence is relevant to the suit; and (iii) the evidence is reliable." *Abante Rooter & Plumbing, Inc. v. Alarm.com Inc.*, 2018 WL 3707283, at \*3 (N.D. Cal. Aug. 3, 2018).

1           “The Ninth Circuit has determined that a ‘trial court not only has broad latitude in  
2 determining whether an expert’s testimony is reliable, but also in deciding how to determine the  
3 testimony’s reliability.’” *AngioScore, Inc.*, 2015 WL 5258786, at \*6 (quoting *Elsayed Mukhtar v.*  
4 *Cal State. Univ.*, 299 F.3d 1053, 1064 (9th Cir. 2002)). “Unlike an ordinary witness, an expert is  
5 permitted wide latitude to offer opinions, including those that are not based on firsthand knowledge  
6 or observation.” *Daubert*, 509 U.S. at 592 (citation omitted). “The focus [of a district court] must  
7 be solely on principles and methodology, not on the conclusions that they generate.” *Id.*, 509 U.S.  
8 at 595.

9           However, “[d]isputes as to the strength of [an expert’s] credentials, faults in his use of a  
10 [particular] methodology, or lack of textual authority of his opinion, go to the weight, not  
11 admissibility, of his testimony.” *Romero v. S. Schwab Co., Inc.*, 2017 WL 5885543, at \*2 (S.D.  
12 Cal. Nov. 29, 2017) (quotations omitted). “The relative weakness or strength of the factual  
13 underpinnings of the expert’s opinion goes to the weight and credibility, rather than admissibility.”  
14 *Bergen v. F/V St. Patrick*, 816 F.2d 1345, 1352 n. 5 (9th Cir. 1987). Likewise, “[a]rguments that  
15 an expert relied on unfounded assumptions in forming his opinion go to the weight, not the  
16 admissibility of expert testimony.” *Haiping Su v. Nat’l Aeronautics & Space Admin.*, 2011 WL  
17 7293396, at \*2 (N.D. Cal. Apr. 7, 2011). “Vigorous cross-examination, presentation of contrary  
18 evidence, and careful instruction on the burden of proof are the traditional and appropriate means  
19 of attacking shaky but admissible evidence.” *Daubert*, 509 U.S. at 596.

20           Further, in consideration of the burden of proof and the “liberal thrust” of Fed. R. Evid.  
21 702, experts are not required to establish causation to a scientific or statistical certainty. *See, e.g.*,  
22 *McClellan v. I-Flow Corp.*, 710 F. Supp. 2d 1092, 1106 (D. Or. 2010) (“In keeping with the court’s  
23 proper role and the ‘liberal thrust’ of Rule 702, I will not exclude plaintiffs’ expert testimony  
24 simply because the evidence supporting it does not establish causation to a scientific or medical  
25 certainty.”) (citing *Daubert*, 509 U.S. at 588). Experts are also not required to eliminate all  
26 alternative explanations or potential causes, so long as the cause identified is a substantial causative  
27 factor. *See Wendell v. GlaxoSmithKline LLC*, 858 F. 3d 1227, 1237 (9th Cir. 2017) (“We do not  
28

1 require experts to eliminate all other possible causes of a condition for the expert's testimony to be  
2 reliable. It is enough that the proposed cause be a substantial causative factor.") (quotations and  
3 citation omitted). "Lack of certainty is not, for a qualified expert, the same thing as guesswork."  
4 *Primiano v. Cook*, 598 F. 3d 558, 565 (9th Cir. 2010).

5 **A. Ms. Verkhovskaya's Methodology And Opinions Easily Pass**  
6 ***Daubert's* Admissibility Test**

7 Defendant appears to make two arguments for excluding Ms. Verkhovskaya's testimony.  
8 Def's Br. at 6-7. First, Defendant states that Ms. Verkhovskaya's "task" of determining "how  
9 many cell phone numbers – not associated with a debtor – Rash Curtis called during the class  
10 period" is not relevant to any issue at trial, and will not be "helpful" to the jury. *See id.*, at 6  
11 ("Exactly what the relevance of the results of this inquiry to the issues here is elusive.").

12 Each of the certified classes excludes the following people: "persons who provided their  
13 cellular telephone in an application for credit to a creditor that has opened an account with  
14 [d]efendant in such debtor's name prior to [d]efendant first placing a call using an automatic  
15 telephone dialing system and/or prerecorded voice." Order Granting Plaintiffs' Motion for Class  
16 Certification, ECF No. 81, at 2. Further, two of the certified classes require that "Rash Curtis has  
17 never had a debt-collection account in [class members'] name." *Id.* Thus, to ascertain the total  
18 number of calls made to class members, Plaintiff's methodology, *inter alia*, removed all persons  
19 that were the debtors on the accounts being called by Defendant.

20 At Ms. Verkhovskaya's deposition, Defendant's counsel's questioning of the goals of her  
21 methodology makes it obvious that Defendant understands the relevance of Ms. Verkhovskaya's  
22 opinion:

23 Q. [Y]ou got three spreadsheets from the plaintiffs' counsel, and it had  
24 all the calls that were made by the dialers and all of the debtor  
account records associated with those accounts, correct?

25 A. Correct.

26 Q. And then you went out and obtained information from third parties  
27 to try and determine who owned or used that cell phone at the time  
that the calls were placed, correct?

28 A. Correct.

1 ...

2 Q. So you took data from plaintiffs' counsel, and you took data from  
3 their party vendors, and you compared the two to try **to figure out**  
4 **which telephone calls were made to non-debtors?**

4 A. **Yes.**

5 ...

6 Q. So the spreadsheet that was provided by plaintiffs' counsel, along  
7 with your report, that's the list of non-debtors or the list of debtors?

7 A. Non-debtors.

8 Krivoshey Decl., Ex. 2 ("Verkhovskaya Dep."), at 78:11-80:15 (emphasis added). The relevance  
9 of this methodology is self-evident.

10 Second, Defendant argues that "no lay juror is going to understand Ms. Verkhovskaya's  
11 Rule 26 Report" because the source for of some of the data Ms. Verkhovskaya relies on is  
12 "unobservable, proprietary processes of LexisNexis and others." *See* Def's Br. at 6. Defendant has  
13 too little faith in the jury system. In fact, jurors have been able to understand nearly identical  
14 opinion testimony from Ms. Verkhovskaya in the past. *See, e.g., Krakauer v. Dish Network L.L.C.*,  
15 2017 WL 2455095, at \*6 (M.D.N.C. June 6, 2017) ("Ms. Verkhovskaya provided clear, cogent  
16 testimony explaining her methodology and the bases for her opinions. To the extent there was  
17 conflicting evidence that questioned the validity, credibility, and weight of Ms. Verkhovskaya's  
18 opinions, the jury weighed that evidence and rejected Dish's evidence."). Further, the technical  
19 nature of her testimony has, in the past, been a factor *in support of* allowing Ms. Verkhovskaya to  
20 explain her opinions to the jury. *See Shamblin v. Obama for America*, 2015 WL 1909765, at \*3  
21 (M.D. Fla. Apr. 27, 2015) ("Due to the highly technical nature of the proceedings, the Court  
22 determines that [Ms. Verkhovskaya is] in a position to substantially assist the trier of fact.").

23 Courts across the country have repeatedly found that Ms. Verkhovskaya is "amply  
24 qualified" to offer her opinions and that her methodology satisfies the admissibility requirements of  
25 *Daubert*. For instance, on June 26, 2018, Judge Jonathan Goodman summarized the case law  
26 concerning nearly identical methodology put forward by Ms. Verkhovskaya in other cases:

27 As an initial, threshold decision, I reject BCA's bid to strike Verkhovskaya's  
28 expert opinion under *Daubert*. The Court finds persuasive the opinion in  
*Shamblin v. Obama for America*, 2015 WL 1909765 (M.D. Fla. Apr. 27, 2015)

1 on this point. That Court denied a motion to strike Verkhovskaya's expert  
2 opinion in a TCPA case (although it then denied certification of the TCPA  
class).

3 The Court found that Verkhovskaya was "amply qualified" to "offer expert  
4 testimony in TCPA case." *Id.* at 3. The Court also found that Verkhovskaya  
5 "employ[ed] generally reliable methodologies which entail, *inter alia*,  
6 **performance of detailed statistical analysis and utilization of LexisNexis  
data that has been independently verified by Verkhovskaya's company[.]**  
*Id.* Thus, the Court concluded, Verkhovskaya's testimony "satisfied the  
strictures of *Daubert*." *Id.*

7 Several other district courts have also relied on Verkhovskaya's expertise when  
8 deciding whether to certify TCPA and other classes. *See Youngman v. A&B*  
9 *Ins. & Fin., Inc.* 2018 WL 1832992, at \*4 (M.D. Fla. Mar. 22, 2018) *report and*  
10 *recommendation adopted*, 2018 WL 1806588 (M.D. Fla. Apr. 17, 2018);  
*Cordoba v. DirecTV, LLC*, 320 F.R.D. 582, 599 (N.D. Ga. 2017); *Krakauer v.*  
*Dish Network L.L.C.*, 311 F.R.D. 384, 391 n. 3 (M.D.N.C. 2015); *Burns v. First*  
*Am. Bank*, 2006 WL 3754820, at \*11 (N.D. Ill. Dec. 19, 2016). The Court will  
do the same here.

11 *Reyes v. BCA Fin. Servs., Inc.*, 2018 WL 3145807, at \*13 (S.D. Fla. June 26, 2018) (bracketing in  
12 original) (emphasis added).

13 In *Krakauer v. Dish Network L.L.C.*, 2015 WL 5227693, at \*8-9 (M.D.N.C. Sept. 8, 2015),  
14 the defendant argued that Ms. Verkhovskaya's "report should be excluded because she did not test  
15 the reliability of data from Lexis or Nexxa." Judge Catherine C. Eagles disagreed:

16 "[A]n expert may rely on data that she did not personally collect" and "need not  
17 have conducted her own tests." *Gussack Realty Co. v. Xerox Corp.*, 224 F.3d  
18 85, 94-95 (2d Cir. 2000) (per curiam). Rule 703 provides that an expert may  
19 rely on facts or data of which the expert has been made aware "[i]f experts in  
the particular field would reasonably rely on those kinds of facts or data in  
forming an opinion." Fed. R. Evid. 703; *see also Ward v. Dixie Nat'l Life Ins.*  
*Co.*, 595 F.3d 164, 182 (4th Cir. 2010).

20 First, Dish does not dispute Ms. Verkhovskaya's testimony and statements in  
21 her report that Lexis and Nexxa provide "maximum accuracy and reliability,"  
22 or that it is common practice in her industry to rely on such data vendors. Ms.  
23 Verkhovskaya testified that she has never had concerns about the work provided  
by Lexis or Nexxa. This may well be enough to allow Ms. Verkhovskaya to  
rely on the data under Rule 703...

24 As to Lexis, contrary to Dish's assertion, A.B. Data<sup>1</sup> has conducted an  
25 independent examination to ensure the reliability of Lexis's data generally. Ms.  
26 Verkhovskaya testified that A.B. Data has, in the past, "perform[ed] a number  
of data tests with Lexis[] where [A.B. Data] run[s] known files against [Lexis]  
databases and measure[s] the output results against known data," and these tests  
have shown 86-97% accuracy. As discussed *supra* concerning Nexxa, there is

27 <sup>1</sup> A.B. Data is Ms. Verkhovskaya's former employer from 2001 until 2016. *See Verkhovskaya*  
28 *Dep.*, at 6:17-18, 21:17-20.

1       **no requirement that an expert conduct an independent evaluation of data**  
2       **and results each time she uses them.** *See Ward*, 595 F.3d at 182; Fed. R.  
3       Evid. 703. And, “[i]n any event, [Dish has] offered nothing to suggest the  
4       [Lexis] data are unreliable or inaccurate.” *Kolbe v. O’Malley*, 42 F. Supp. 3d  
5       768, 780 (D. Md. 2014).

6       *Krakauer*, 2015 WL 5227693, at \*8-9 (bracketing in original) (emphasis added).

7       Ms. Verkhovskaya attached two exhibits to her report listing over twenty cases where her  
8       methodology was used in either certified and settlement class actions. *See Verkhovskaya Report*,  
9       Exs. B and C. Like in *Krakauer*, Ms. Verkhovskaya explained why she believes that data gathered  
10      from LexisNexis is reliable, an opinion that Defendant *does not challenge herein*:

11       There’s several factors that help me form my opinions over the reliability of  
12       [Lexis]’ information. First is that [Lexis] is a company that’s been around for  
13       over a hundred years that’s been aggregating the data for decades and  
14       supporting thousands of industries, including the legal industry. My experience  
15       of nearly 20 years specifically in the class action administration industry tells  
16       me that out of approximately 300 class actions, 400 class action administrations  
17       that occur every year, about 90 percent of cases when it comes to class member  
18       location identification rely on [Lexis]’ data for the past 35, 40 years.

19       Second, I performed a testing of live cases for the past 20 years or so where I  
20       compared claims data against the reverse append data that I received from  
21       [Lexis]’ reverse append files. Third, I performed intensive independent testing  
22       of the results of [Lexis]’ database, and all of that, plus my experience led me to  
23       formulating an opinion that the data provided to me by [Lexis] is reliable and I  
24       can form an opinion expressed in my report.

25       Verkhovskaya Dep., at 87:13-88:20.

26       Further, Defendant’s suggestion that Ms. Verkhovskaya’s use of the “fuzzy match” process  
27       is not “testable” is also not true. Defendant’s reference to the “fuzzy match” process refers to Ms.  
28       Verkhovskaya’s methodology of comparing the names of the debtors on Defendant’s accounts to  
29       the customary users of the telephone numbers that received calls from Defendant. A match is  
30       “fuzzy” when it is not immediately apparent whether the debtor and the called party are the same,  
31       such as when the names are similar but not identical. *See Verkhovskaya Report*, at ¶¶ 26-33. Due  
32       to the large volume of data, Ms. Verkhovskaya used an algorithm whereby a computer program  
33       would “kick out” the “fuzzy” matches for manual review by Ms. Verkhovskaya personally, so that  
34       she could determine whether the name of the debtor and called party actually matched. *See*  
35       Verkhovskaya Dep., at 132:13-135:11. Ms. Verkhovskaya testified that the “fuzzy match”  
36       algorithm was also tested repeatedly when it was developed. *See gen. Id.* at 125:12-136:3.

1 Further, Ms. Verkhovskaya testified that she has “tremendous expertise on fuzzy matches.” *See Id.*  
2 at 127:12-5.

3 Further, the demographic data Ms. Verkhovskaya obtained from Lexis to complete the  
4 “matching” process was produced to Defendant. *See Id.* at 124:11-15 (“Q. I’m asking, have you  
5 produced every version of the steps you took to so-call show your work? A. Everything that was  
6 exported into spreadsheet, submitted to third party vendors, relied upon or received from third  
7 party vendors was produced.”). Thus, if Defendant thought that Ms. Verkhovskaya’s methodology  
8 resulted in even one incorrect “match” between the debtor on Defendant’s account and the called  
9 party, Defendant could have completed the “matching” process itself and have pointed out  
10 inconsistencies.

11 However, Defendant does not contend that Ms. Verkhovskaya’s opinions are factually  
12 incorrect. Of the 40,420 non-debtor class member telephone numbers Ms. Verkhovskaya  
13 identified in her report, Defendant has not submitted evidence that a *single one* of these numbers  
14 actually belonged to a debtor. *See Verkhovskaya Report*, at ¶ 26. Defendant is in possession of the  
15 account records for every one of the 40,420 numbers Ms. Verkhovskaya identified, and could not  
16 find one that actually belonged to the debtor on the account. Further, Defendant does not challenge  
17 Ms. Verkhovskaya’s opinion that each of the 40,420 numbers are assigned to cellular telephones.  
18 *See id.*, at ¶¶ 16-19, 26. Defendant’s Rule 30(b)(6) witness (Dan Correa) testified that Defendant’s  
19 systems have the of determining which phone numbers are cell phones, and to exclude such  
20 numbers from its calling campaigns. *See Krivoshey Decl.*, Ex. 3 (“Correa Dep.”), at 58:16-59:6,  
21 60:24-61:16. Here, however, Defendant could not identify even one number out of 40,420 that was  
22 not assigned to a cellular telephone.

23 In Defendant’s only cited case in support of striking Ms. Verkhovskaya’s testimony, *Wilson*  
24 *v. Badcock Home Furniture*, 2018 WL 6660029, at \*3 (M.D. Fla. Dec. 19, 2018), the court *did not*  
25 *strike* Ms. Verkhovskaya’s testimony. Rather, the Court denied class certification on  
26 predominance grounds. *Wilson*, 2018 WL 6660029, at \*4. Although the court took some issue  
27 with Ms. Verkhovskaya’s methodology *in that case*, the Court explicitly did “not base its ruling  
28

1 upon, nor definitively resolve” whether Ms. Verkhovskaya’s methodology could be used to  
2 identify class members under an ascertainability prong. Notably, in the Ninth Circuit, as this Court  
3 has ruled, ascertainability is not even a requirement. *See* Order Granting Plaintiffs’ Motion for  
4 Class Certification, ECF No. 81, at 12 n. 12 (quoting *Briseno v. ConAgra Foods, Inc.*, 844 F.3d  
5 1121, 1126 (9th Cir. 2017)).

6 Further, in *Wilson*, the court cited to “a defense expert” that disputed the accuracy of Lexis  
7 data. *Wilson*, 2018 WL 6660029, at \*4. Here, Defendant has not submitted any expert testimony,  
8 and, most glaringly, has not actually disputed a single factual finding expressed in Ms.  
9 Verkhovskaya’s report. And, as discussed above, to the extent that *Wilson* suggests that Ms.  
10 Verkhovskaya categorically cannot use Lexis as a resource, which *Wilson* does not, it is an outlier  
11 opinion that is not persuasive. *See e.g., Reyes*, 2018 WL 3145807, at \*13 (summarizing case law  
12 supporting Ms. Verkhovskaya’s methodology).

13 Accordingly, Defendant’s motion to strike Ms. Verkhovskaya’s report should be denied.  
14 Defendant does not challenge Ms. Verkhovskaya’s experience or expertise. To the extent that  
15 Defendant contends that the third-party sources Ms. Verkhovskaya used provided inaccurate data,  
16 the argument goes to the weight to be afforded to Ms. Verkhovskaya’s testimony, not its  
17 admissibility. And, because Defendant has not submitted any *evidence* undermining the reliability  
18 of Ms. Verkhovskaya report, her report should not be excluded.

19 **B. Defendant’s Arguments Based On Opinions That Ms.**  
20 **Verkhovskaya Does *Not* Put Forward Should Be Ignored**

21 In the introduction, Defendant states that Ms. Verkhovskaya’s testimony should be  
22 excluded because she “has assumed every number found in phone fields 5 through 10 at Rash  
23 Curtis was skip traced; she then subtracted any common numbers found in phone fields 1 through  
24 4; and arrived at her estimate of the number of skip trace numbers called.” Def’s Br. at 2. Ms.  
25 Verkhovskaya has not made such assumptions, and, further, she has not provided an opinion  
26 concerning the amount of skip traced phone numbers that Defendant called. Notably, to the extent  
27 that was no clear from her report, Defendant knows this from her deposition testimony:  
28

1 Q. Okay. Have you ever been asked to determine whether any of the  
2 telephone numbers listed in your final spreadsheet were skip traced  
by Rash Curtis?

3 A. No.

4 Q. When I say skip traced, I mean obtained from third party data  
5 aggregators much the same way you obtained information from  
[Lexis]. Do you understand that? Because you had given a different  
6 kind of definition for skip tracing for your industry earlier.

7 A. I was not asked to do that.

8 Verkhovskaya Dep., at 143:5-14. Ms. Verkhovskaya also has not been asked to and has not  
9 provided any opinion concerning whether Plaintiff Perez's phone number was obtained through  
skip tracing or his debtor status:

10 Q. Okay. You have no opinion whether any of the plaintiffs' phone  
11 numbers were skip traced in this case, correct?

12 A. Correct.

13 Q. You have no opinion whether any of the plaintiffs are debtors or  
14 non-debtors in this case, correct?

15 A. I have no opinions.

16 Q. Is that because you were never asked to determine that or because  
17 you just don't know.

18 ...

19 A. ... I did not do any work to look for their telephone numbers in the  
20 source data or in the final product, nor do I know their telephone  
21 numbers.

22 *Id.* at 143:15-144:8.

23 Defendant's statement that Ms. Verkhovskaya "subtracted any common numbers found in  
24 phone fields 1 through 4" is also factually incorrect. *See* Def's Br. at 2. Plaintiff's expert Colin B.  
25 Weir was the person that assembled a list of phone numbers in phone fields 5-10 and then removed  
26 all instances where such numbers were also contained in phone fields 1-4. Krivoshey Decl., Ex. 4  
27 ("Weir Decl."), at ¶¶ 6-12. After performing this analysis, Mr. Weir gave the resulting dataset to  
28 Ms. Verkhovskaya to perform the analysis discussed in her report. *Id.*, at ¶ 12. Ms. Verkhovskaya  
then took Mr. Weir's data (through Plaintiff's counsel) and identified calls made to cellular  
telephone numbers and to non-debtors within that dataset. *See id.*, at ¶ 13; Verkhovskaya Report,

1 at ¶ 14. Critically, Plaintiff’s expert Randall A. Snyder will testify that the resulting 40,420 class  
2 member telephone numbers identified in Ms. Verkhovskaya’s Report were obtained through skip  
3 tracing, not Ms. Verkhovskaya or Mr. Weir.

4 Further, as discussed at length in Plaintiff’s opposition to Defendant’s motion to exclude  
5 the testimony of Mr. Snyder, it is Mr. Snyder, not Ms. Verkhovskaya, who will testify that Plaintiff  
6 Perez’s cellphone was obtained through skip tracing and that Plaintiff was not a debtor. The  
7 admissibility of Mr. Snyder’s testimony, however, is addressed in Plaintiff’s opposition to  
8 Defendant’s motion to exclude Mr. Snyder’s testimony, and is incorporated herein to the extent it  
9 is relevant. Plaintiff will not repeat those same arguments again herein.

10 Defendant also states that Mr. Perez’s cell number was not “identified by the process used  
11 by Ms. Verkhovskaya.” Def’s Br. at 6. As discussed above, Ms. Verkhovskaya did not set out to  
12 find his number, did not know his number, and has no opinion concerning whether his number was  
13 obtained through skip tracing or whether he is a debtor. She simply analyzed the data provided to  
14 her by Mr. Weir, not the entire universe of data in Defendant’s accounts. The data provided by Mr.  
15 Weir, however, is *underinclusive*. It does not necessarily capture *all* calls to *all* class members. It  
16 only captures class member calls for which data still *exists* and for which Defendant *provided* data.  
17 For instance, according to Defendant, Plaintiff’s cellphone number may have been removed  
18 entirely from Defendant’s database. *See* Defendant’s Motion to Strike or Exclude the Opinions of  
19 Plaintiffs’ Expert Witness Randall A. Snyder, ECF Doc. No. 254, at 19 (stating that Defendant  
20 “removed the 5193 number from Rash Curtis’ database”). If, in fact, Defendant removed  
21 Plaintiff’s number from its database, then of course Plaintiff’s phone number could not show up  
22 through Ms. Verkhovskaya’s methodology, as it relied on phone numbers *that have not been wiped*  
23 *from Defendant’s records*. That does not mean, however, that her methodology is unreliable as to  
24 the numbers actually identified – all of them are cellphones belonging to non-debtors. Defendant  
25 should not be able to use its own inadequate record-keeping as an argument for striking Ms.  
26 Verkhovskaya’s report. *See, e.g., Zyburow v. NCSPPlus, Inc.*, 44 F. Supp. 3d 500, 503 (S.D.N.Y.  
27 2014) (granting class certification in a TCPA case where “Defendant [was] in effect asking the  
28

1 Court to reward its imperfect record-keeping practices”). *See also Reyes*, 2018 WL 3145807, at  
2 \*13 (“To be sure, BCA’s expert does raise salient gaps in Verkhovskaya’s methodology. But a  
3 less-than-perfect opinion may still be admissible even if it contains gaps.”); *Krakauer*, 2015 WL  
4 5227693, at \*10 (“The alleged deficiencies with Ms. Verkhovskaya’s results go more to the weight  
5 of the expert [evidence] than to its *Daubert* admissibility.”).

### 6 **C. Objections To Evidence**

7 Defendant states that “records do exist that would reveal the so-called ‘SKP’ or skip-trace  
8 status code” and that “[i]t is in the collection notes used by Rash Curtis’ collectors that the unique  
9 ‘SKP’ skip-trace status code is to be found.” As discussed at length in Plaintiff’s opposition to  
10 Defendant’s motion to exclude the opinions of Mr. Snyder, Defendant maintained through all of  
11 fact discovery that records bearing the ‘SKP’ marking do not exist, and even stated in response to  
12 an Interrogatory that it had no such records. Accordingly, Defendant’s references to the “SKP”  
13 marking should be stricken pursuant to Fed. R. Civ. P. 37(c). Plaintiff incorporates all arguments  
14 and objections made to references to the “SKP” status code in his opposition to Defendant’s  
15 motion to strike Mr. Snyder’s opinions herein.

16 Defendant has attached as Exhibit 2 to its Master List of Exhibits a copy of the *full*  
17 deposition transcript from Ms. Verkhovskaya’s deposition. *See* ECF Doc. No. 252-3, 252-4.  
18 However, on the record at the deposition, Plaintiff and Defendant’s counsel agreed to “designate  
19 the entire record as confidential” and to later “confer which portions of the record” should remain  
20 confidential. ECF Doc. No. 252-4, at 155:12-21. Specifically, Plaintiff’s counsel wished to  
21 designate testimony regarding Ms. Verkhovskaya’s salary and the salaries of her employees  
22 confidential pursuant to the protective order. *See id.* *See also* Stipulated Protective Order for  
23 Standard Litigation As Modified By The Court, ECF Doc. No. 29. While Plaintiff agrees that the  
24 vast majority of Ms. Verkhovskaya’s deposition testimony should not be confidential, Defendant  
25 never reached out to Plaintiff to meet and confer about which sections should remain confidential  
26 before filing *the entire transcript* publicly. Krivoshey Decl., at ¶ 6. Plaintiff requests that the  
27 Court strike the deposition transcript in its entirety and order Defendant to refile only the portions  
28

1 of the transcript that are deemed non-confidential after a meet and confer process. Notably, as the  
2 designating party, Plaintiff hereby de-designated the portions of Ms. Verkhovskaya's deposition  
3 testimony attached to Mr. Krivoshey's declaration in support of this motion. *Id.* Plaintiff agrees  
4 that all portions of the deposition transcript cited herein are not confidential pursuant to the  
5 protective order. *Id.*

### 6 **III. CONCLUSION**

7 For the foregoing reasons, Defendant's motion to strike or exclude the opinions of Ms.  
8 Verkhovskaya should be denied in its entirety.

9  
10 Dated: February 11, 2019

Respectfully submitted,
